In the 2015 ERA rankings UWA was rated ‘5’ – well above world standard for Human Movement and Sports Science.

The School of Sport Science, Exercise and Health (SSEH) is internationally renowned for the high quality of our graduates, as well as our high-impact and translational research under the following themes:

- High Performance in Sport and Industry
- Prevention and Management of Chronic Conditions
- Physical Activity and Health Through the Lifespan
- Principles and Mechanisms – new technology, basic research and modelling

SSEH is one of only three such Schools within the Group of Eight – the research intensive universities in Australia. We were also the first Australian university to establish undergraduate and postgraduate degrees in Sport and Exercise Science. Our dedicated academic staff are leaders in their respective research fields, and at the same time have a strong student focus in their teaching. Many have won UWA and national awards for teaching and student supervision.

Our PhD and Masters (by research) degrees offer rich and supportive environments for students to develop research and analytical skills, and to participate in seminars and workshops. PhD candidates are supported to attend national and international conferences, which provide excellent opportunities for networking and sharing knowledge with other researchers in their field.

Graduate coursework courses are designed to provide advanced level knowledge and skills in order to prepare graduates for leadership roles in government and industry. These include:

- Graduate Diploma in Exercise Rehabilitation (graduating ESSA accredited Exercise Physiologists)
- Graduate Diploma in Work, Health and Safety (training future OSH professionals)
- Graduate Diploma in Sport and Recreation Management (in partnership with the Business School)
- Graduate Diploma in Education (specialising in Health and Physical Education)
- Master of Exercise Science and Master of Health Science
- Master of Clinical Exercise Physiology (also graduating ESSA accredited Exercise Physiologists)

Bachelor of Science students can undertake two majors offered by SSEH – the Sport Science major and the Exercise & Health major. Graduates who complete the double major are eligible to become ESSA accredited Exercise Scientists.

Our graduates fill key positions in various government, public, private and not-for–profit organisations within Australia and overseas (see: sseh.uwa.edu.au/career). SSEH graduates rate our courses very highly and many maintain their connection to the School through the SSEH Alumni Association (see: sseh.uwa.edu.au/alumni).

UWA is ranked 1st in Australia and 25th in the world for Life and Agricultural Sciences.
